Fix WIC error If you encounter any issues or get stuck, you can contact the technical support center by calling the WIC Support Team 1-800-531-2422. From the support page, you will need to enter a lot of codes and then you will get a serial number which you need to provide to the website WIC Reset Utility Tool to get the key. Once you successfully reset the key, you will get your WIC back and can use it on your PC. Another way to get your WIC back is by downloading the Epson adjustment program and installing it on your PC. This program can read the WIC key and reset the key for you. How to Reset WIC Error Using WIC Reset Utility Tool WIC error is one of the most common errors that users encounter. As users experience this error, they get frustrated and end up losing data. To overcome this issue, you need to reset your WIC key. A few clicks and you can get your WIC back. Go to the website WIC Reset Utility Tool. Select your region and fill in the appropriate data. Then you will need to enter your email address and click on the button "I Accept". Finally, you will get your WIC key serial. Once you get the key, you will need to copy it. Now go to the website on which you reset your key. Now fill in your WIC key and click on the button "Reset WIC". Now you can use your WIC key on your PC. Guide to Fix WIC Error You may encounter WIC error on your computer. Your error may be caused by virus, incorrect operation or when you use the wrong keyboard and mouse. Your motherboard and the software installed in it might be malfunctioning. You can solve your WIC error by following these steps: Firstly, you need to check if your software and hardware is working properly. Make sure that your video card is installed properly. Your PC may be overheating or your motherboard may be faulty. Your keyboard and mouse may be connected to the wrong port or may be incompatible. You need to use the right software for your PC. Once you have installed the software, reboot your PC and check if the software has fixed your WIC error. You can check your motherboard for errors. 82157476af
