This should be removed and not allowed to be purchased. It is a dead game, no support, and the devs took the money and run. How is there anyone making a positive review? They don't actually review anything or even play... This game has been dead for years and yet there is positive reviews from some individual accounts.. What a scam.. The gods can and will put plagues on your city because you didn't party enough at the festival.

While it's still got a few kinks, it's a solidly-made city building game in a setting that's not seen very often. Casual and great for fans of ancient egypt.. It basically feels like a beta for an early Battlefield game. Not bad if you can snag it on sale. A good sale though.. Have to have a controller or else you can not play.

Local multiplayer only.. Bought this game today to add to the couch games collection I have been building up, since it's so hard to find good couch games nowadays, and it makes a great addition to the collection. It has to be said that while this game looks cute and innocent it WILL have you clawing at the faces of anyone you play with, and is actually pretty difficult (at least with 2 people I have no idea if you can even play with more than that). The challenge mode is basically like Overcooked's normal campaign, which is another similar game on Steam. I would recommend Overcooked over this game if you are only in it for the challenges, as it's just the same as this but more in depth challenges. If you would prefer the buying upgrades and actually running a restaurant type gameplay then this game is probably more your style.

So in the end I would say I give this game a solid 8/10 for fun but I think the type of game that it is really serves to be played with other people, I would not recommend buying if you only have one controller or no one to play with.. While there isn't much to it in terms of events, the feel and flow, by far the most important aspect of a game like this, is fantastic and the closest we've come to 'Skate on a snowboard'! Buy the game so the developers have a bit of budget for a more complete sequel (and a better name.) Absolutely recommended for gameplay enthusiasts!. So I was watching some high-round Zombie games on youtube, Xbox/PS3 tend to bug and freeze/restart in th later rounds, experiencing problems such as a huge framerate issue, laggy or missing textures, G-spawns, the game restarting after you had used up the small amount of memory etc. etc. Since I have Bootcamp installed on this Mac, I decided to buy it for mac instead of PC because of the steep price difference. (£30.00 for a 3 year game?!?!?) Which was a terrible mistake. The first thing that comes to mind is that there is no steam support, the game opens in a seperate window. This leads to Friend notifications being oddly placed in the corner of the screen. This can lead to the covering of vital information such as the minimap, ammo --. It also means I can't chat to my friends in game. In order to speak with them, I have to exit the damn game. Why? Is it that hard just to reskin the PC version of the game? That was what I was expecting and hoping for. But I digress. The Second thing that you will probably be checking is the Options menu. The first thing that pops out is that there is NO FOV SLIDER. I must have spent 10 minutes looking for it, and when I finally decided that it wasn't there, I was really annoyed. I don't see why companies don't think that having changeable FOV is not a big deal. For me it was Irritating to my eyes, and I had to take short breaks at intervals. Also, the graphics. The texture quality ONLY GOES UP TO 1200 BY 800. EVEN TEAM FORTRESS 2 HAS 2000 BY SOMETHING AND THAT GAME IS SEVEN. YEARS. OLD. Great game by the way. So after that, I decided to play Zombies. My internet was down at the time, and what happened next was probably the single most annoying thing in the game. I COULD NOT PLAY SOLO OFFLINE. WHY?!? What is the point of having a Solo mode if I can't play while I've taken it out? I thought that was the point of a laptop; you can take it with you when you need it. I tried to load up Shangri-La, one of my favourite maps because of it's challenging, yet rewarding nature. But It failed to load THREE TIMES, the game crashing on every one of them! I won't touch on how there are approximately ZERO people to play with, since I am a solo player and I don't play with randoms, as I have had several bad experiences with less experienced players. But since Aspyr was too lazy, they did not put in cross-platform support in. They really shot themselves in the foot here, as 90% of the servers that THEY HAVE BOUGHT ARE NOT BEING USED. I only found one server with players on it, and it wasn't even full. Perhaps 3 on weekdays. In short, DO NOT BUY THIS GAME. You'll be better off, with a reasonable sized community still playing the game just buying a cheap console and a second hand Black Ops for it. Avoid this like the plague.. Relaxing, fun, pretty, psychedelic, unique game. Whenever I need to relax after some zombies or killer robots, A quick round of BLARP! never fails to calm me down and put a smile on my face. Love it.. A mighty attempt at keeping the series fresh, suffering from a lack of pc optimisation and testing. The 360 pad support is there, but everything else looks like it needs more work done with it. In a game about puzzles fused with speedrunning you're thinking 4 player would be an amazing idea! But then you remember it's incredibly easy to troll each other, which will happen 100 times more often than the military like precision needed to make full use of co-op speedrunning. There's a vs mode I haven't tested, but I imagine it has a lot to do with the aforementioned trolling.

Only get this if you REALLY love the series, love the character, have local friends who are more likely to work together than

troll and Vor it's on sale. Well I really enjoyed this game, took me 71 hrs to beat it! a huge world lots to explore, well worth the price. great old school RPG, graphics are simple but work in the context of this kind of game, descriptions of places and events are well done and bring to life what the graphics don't. will be interested to see what kind of games spiderweb will be bringing out with the new game engine that they are working on.

---

I used to play this game on my Xbox, now i have it again :D

It's so worth buying since it is fun!. Mars Odyssey is short and straightforward but it is stronger because of it. You check out a space station then repair some robots on Mars. Along the way I learned a little about Mars and the real robots who have been exploring it on our behalf. Most importantly, I got lost in the experience and by the end I was excited about the future of our species on Mars and among the stars. This is not a game but as an educational experience, I loved it.. This game is the exact same as RC2, including all the bugs; but with new bugs too!

Rucks make no sense. I can have 5 guys around a ruck against one person (who has the ball, no defence backup), and they still win.

Game glitches way too often. My players hair will go from long to bald when he is running.

The audio is probably one of the worst parts; cuts from a human voice to a computer generated voice.

The game is fun for like an hour, and then gets boring really quickly. 100% not worth the £39.95, even if you're a massive rugby fan like myself.. Why? Why? Why?. Its Monkey 4 exactly like it was on release, if you start it with the "Launch Monkey4" option.

When you launch it with the config tool, you get a nostalgic menu, but the game becomes very buggy, when saving my computer bricked so hard, I had to restart it.

But If you dont choose the config option you are fine, sort of...

The graphic options are straight from 2000 and without external tools (I recommend dgwoodoo) you are stuck with 640x480 and even if you use higher resolutions, the games visuals have aged very poorly (especially compared to Monkey1-3), for the most parts of the game. The only things that look good are some backgrounds, which are a treat for your eyes.

The Game forces fullscreen (if you want to play windowed you need the dgwoodoo) which can be a problem, because the only way of getting out of the game is closing it.

The writing is worse than the writing of Moneky1-3, but that doesnt says anything. The other games are better, but this is still preety good and it has the typical Lucasarts humor, given that we cant expect any new games of this type, I take what I can get. The dialoges are still funny and you wont have a bad time playing and listening to this.

A big part of Lucasarts adventures are the puzzles and Monkey4 does, if you ask me, on of the best jobs of all Lucasarts games. Yes, they are a little easier, but that is because they less cryptic. The sollutions are still very unusual, but they make sense (apart from the cataloging puzzle in the prothesis shop, this still melts my brain). The puzzles the highlight of the game, you solve them easier (which is more fulfilling) and they are often times fun to solve, have hillarious sollutions and are very creative. The only downside are the time based puzzles which are in combination with the controlls sometimes a bit frustrating, but nothing impossible.

Given that this games controlls where made for the PS2, the keyboard controlls are very unusual.

Either you play with a gamepad or you adapt to the keyboard, here are some tips to make this easier:

1.Bind "Look", "Use", "Take", "Inventory" and "quick leave" to keys on the right side of the Keyboard. I chose Look=Q Use=W Inventory=E Take=R and Leave=F, otherwise I left them normal (Arrow Keys are walking(you cant change that) and Page Up/Down cycles trough the things Guybrush is looking at, the Game uses shift(it doesnt matter if it is Lshift or Rshift)).

2.You should write the Controlls down, because they are very counterintuitive. You need practise to get good at this and even then it doesnt work flawlesly.

3.F1 brings up the ingame menu

4.Practise even more, seriously, these controlls are much worse than Grim Fandagos tank controlls

If you already played Monkey Island 1-3, you should pick this up to, the others are better, but this is still pretty good.

If you want to play your first Lucasarts Adventure, you shouldnt buy this, play the Monkey Island games in order (because there are many jokes referencing older titles of this series) and if you are done with Monkey Island 3, you should buy Day of the Tentacle and Grim Fandango first. This game is for Lucasarts fans only, not because its bad, because there are much better Lucasarts games out there (many of them are one Steam as well). A vivid retelling of the Sorcery books. The story comes to life as you make choices that matter and explore this fantastical world!

<https://www.youtube.com/watch?v=trPv2oboP2w>. i found this game to be fun, however ... yes a however. playing without a mouse takes some getting use to and u are basically u are required to use a game pad right from the start without having a choice. also a tractor uses imense amount of fuel. cant finish a field without refueling a few times.limited types of equipment to

---

buy and cant pick up bales on forks of loader. great fun if u dont need much complexity.. Wonderful anad amazing game also gets my closer to my dream of world domination Errr i mean Ummm World Peace..... Not a bad game. Pretty common though for the genre. Only problem is there does not seem to be a following. I was very rarely attacked. It got boring fast for that reason. I cannot recommend it because of it.. Really enjoy this little app. It's a lovely piece of digital ambience, with a bit of a learning curve for the first few minutes. After that, it becomes a wonderfully relaxing way to spend half an hour napping.
